Payroll is one of the most visible proof points of how well your organisation runs. When it falters, trust erodes – with your people, your unions, your regulators and your board. When it performs brilliantly, it becomes a quiet but powerful engine for confidence, resilience and better decision-making.

Zellis Managed Services is designed specifically for complex UK and Ireland enterprises that can't afford for payroll to fail. It combines an integrated payroll platform, managed services, consultancy and business intelligence in one solution – so you minimise risk, control cost and turn payroll into strategic value, not just a back-office process.

KEY OUTCOMES FOR HR AND FINANCE LEADERS

REDUCING RISK AND COST

- Strengthen payroll accuracy and timeliness to reduce errors, overpayments, adjustments, complaints and compliance risks.
- Reduce operational issues across your organisation – from employee relations to finance rework and audit queries.
- Proactive controls and analytics help reduce overpayments and highlight anomalies before they reach employees.

ALWAYS ON - EVEN WHEN YOU ARE UNDER PRESSURE

- Consistent delivery even during staff shortages, unplanned absences, cyber incidents, IT outages or seasonal peaks.
- Built-in continuity plans and specialist teams enable payroll runs when your internal capacity is stretched.
- Flexible service design supports peak calendars, large change events and periods of rapid organisational change.

Getting recruitment and onboarding right is a real focus for us... In some cases, it can be up to a year between an individual accepting a job offer and the actual start date. So when we do attract talent into the business, we have to do everything we can to retain them.
